## OUR EXPERIENCES

(Ongoing Project)

### CONSULTING SERVICES FOR PLANNING MANAGEMENT AND FELLOWSHIP SUPPORT PROFESSIONAL HUMAN RESOURCES DEVELOPMENT IV (PHRD-IV), JICA LOAN AGREEMENT NO.: IP 568.

PHRD-IV is a capacity building project with the objective to strengthen the institutional administration capacity of the central and local government in Indonesia, in order to facilitate the decentralization process, through human resource development of the government planners nationwide by implementing selected Education Programs and Training Programs in Indonesia, Japan, and other Asia Pacific countries. The Consulting Services of the PHRD-IV started in June 2016 and will finished on June 2026. This the largest and the longest project managed by TRIPPCONS who's leading the consortium of 4 national companies. The project offices located in Tokyo, Japan and Jakarta, Indonesia.

The Consultant provided planning, management and implementation support for Human Resources Development of central and local government in Indonesia by sending selected participants for degree and non-degree program both overseas and domestic.

Degree program consist Master Linkage (overseas), Master Regular (overseas), Doctor Regular (overseas), Master Regular (Domestic) and Doctor Regular (Domestic). While Non-degree program consist of Short-term Training Regular, Short-term training Linkage, Staff Enhancement (1 month), Conference Participation, Academic Exchange from Japan, Academic Exchange from Indonesia and On-the Job Training (3 months and 5 months).

During the implementation from 2016 until 2022, the project successfully sending 3,187 participants for degree program and 672 participants for non-degree program.

### EU POLICY AND OUTREACH PARTNERSHIP (EUPOP), INDONESIA

Under Consortium of AESA, TRIPPCONS also currently implementing the EUPOP Indonesia under EU-financed project. The project started in September 2018 and will finished on December 2023.

EUPOP Indonesia is expected to use in a strategic and effective manner public and cultural diplomacy and outreach instruments to target current policymakers/ policy influencers and opinion shapers/ multipliers and in particular the next generations thereof. Through the EUPOP activities it is expected to fill the identified knowledge gap, revise misperceptions and counterbalance the negative news headlines through highlighting the positive aspects of the EU to the selected target audiences, increasing trust and understanding, and conveying key messages about the value and importance of working with the EU. The European Union and knowledge about the EU's values, policies and principles shall be brought into the cognizance of the target audiences.

EUPOP Indonesia comes at a very opportune moment as it can take advantage of a growing interest in the EU and contribute timely to tackle the lack of awareness about the EU and its actions. It is expected to contribute to creating and nurturing the necessary conducive environment for an intensified EU Indonesia bilateral relationship now and in future. Thereby, it bolsters the implementation of the Partnership and Cooperation Agreement and related policy dialogues.

The overall objective of this project is to strengthen the EU's ability to engage in a meaningful and effective dialogue with selected target audiences in Indonesia in order to enhance the widespread understanding and visibility of the Union and its role on the world scene.

The activities under EUPOP Indonesia project take place in the capital Jakarta as well as in selected locations in the Indonesian provinces. In exceptional cases some activities could also take place in Europe as well as in other ASEAN countries. EUPOP Indonesia from 2018 to March 2023 has been organised 101 activities around 5 thematic policy clusters: 1.Climate Action and Environment; 2. Higher Education and Research; 3. Human Rights and Democracy; 4. Trade and Investment; and 5. Culture and Media.

## OUR EXPERIENCES

(Ongoing Project)

### EU – BRUNEI DARUSSALAM PARTNERSHIP FACILITY

The EU-Brunei Partnership Facility is the project financed by the European Commission with duration of 2 years implementation, from December 2022 to November 2024. The project is the first and the newest TRIPPCONS Regional Project, which fully implement in Brunei Darussalam.

The overall objective of EU – Brunei Darussalam Partnership Facility is to strengthen the European Union – Brunei Darussalam Relationship, with the specific objectives to strengthen the mutual awareness, understanding, and appreciation between partners across a range of policies, by increasing bilateral contacts in official dialogues, in second-track and professional cooperation, and at a people to people level, and through supplementary media outreach.

The task of the Consultant, including a) Implement policy dialogue and public diplomacy events and campaigns; and b) Establish local partnership for EU to continue nurturing the development of its relation with Brunei, with the target output as follow:

- Output 1: Increased contact at universities/students level through the organization of **Ambassador Lectures** and scholarship/research promotion.
- Output 2: Increased Bilateral Contacts through the organization of **Policy Outreach and Exchange Seminars**
- Output 3: Increased awareness about EU scholarship program and research opportunity through the organization of two **webinars promoting Erasmus+ and Horizon Europe programs**.
- Output 4: Increased Campaign for **Beach/River Clean-up** to build the awareness and the understanding about the importance to protect the ocean and river.
- Output 5: Increased exposure to EU roles through the **visit to European Union by 5 journalists**.
- Output 6: Increased public contact through **Media Outreach**.
- Output 7: Increased public contact through organizing **European Union Cultural Event**.

### EU – INDONESIA COOPERATION FACILITY (EUICF)

The EUICF is the project financed by the European commission with duration of 3 years implementation, from December 2022 to December 2025. The project is led by the IBF consulting, Brussel, with member of consortium including TRIPPCONS and IDCOMM.

The overall objective of EUICF is The overall objective (Impact) to which this Facility is to enhance the EU-Indonesia partnership, with the specific objectives as follow:

- (Outcome) 1: Continue and reinforce EU-Indonesia relations and policy dialogues;
- (Outcome) 2: Promote an increased alignment between EU-Indonesia interests, principles, policies, and values, including human rights and gender equality, with a particular focus on the 2030 Agenda and the Sustainable Development Goals (SDGs);
- (Outcome) 3: Build increased public awareness, understanding and approval of the EU and its role in Indonesia, the region and the world;
- (Outcome) 4: Enhance climate, biodiversity and environmental management, mainstreaming and monitoring, as well as conservation, sustainable, management use and restoration of natural resources.

The main stakeholders of the Facility include:

- EU Institutions including the EEAS, European Commission services, EU sectoral Agencies where appropriate;
- EU Member States and their relevant institutions;
- Indonesian Ministries and national government agencies;
- EU and Indonesian civil society, academia, institutions, agencies, private sector, national and local governments and other actors will be associated when appropriate and relevant;
- For strategic communication and public diplomacy activities, the target groups will include “next generations” (e.g. young people, students, academics), political and decision makers, multipliers (e.g. media, influencers), as well as other relevant stakeholders.

### **INSTITUTIONAL STRENGTHENING FOR AGRICULTURAL IRRIGATION (ISAI), REGIONAL CONSULTANT FOR EAST AND WEST NUSA TENGGARA, UNDER INTEGRATED PARTICIPATORY DEVELOPMENT AND MANAGEMENT OF IRRIGATION PROGRAM (IPDMIP), FINANCED BY ASIAN DEVELOPMENT BANK (ADB) LOAN 3529-INO (OCR)/8327 – INO (AIF), UNDER EXECUTING AGENCY OF DIRECTORATE GENERAL OF REGIONAL DEVELOPMENT (DGRD), MINISTRY OF HOME AFFAIRS (MOHA). DURATION FROM JUNE 2018 UNTIL JULY 2022**

This technical assistance service aims to assist the DGRD, MOHA and Provincial and District BAPPEDA in supporting the implementation of (i) sustainable systems and irrigation capacity of agricultural institutions, and (ii) enhancing the implementation of irrigation operations and maintenance, including increasing human resource capacity, coordinating among program stakeholders.

Jaya Ancol Development which is engaged in tourism (Eco Tourism) intends to carry out the Development, Management and Development of the Ancol Area with activities including the development of Eco Tourism in the East Ancol area of ± 120 Ha and West Ancol covering an area of ± 35 Ha. One that will be developed in the near future is East and West Ancol Eco tourism which is located on the north side of Carnaval Beach.

The Study on the Impact of Global Warming on the development of Eco Tourism in East Ancol and East Ancol aims to:

- Assessing the influence of direct and indirect impacts such as the environment/ecosystem on the East Ancol and West Ancol Eco Tourism development plans.
- Incorporating climate change adaptation in land use planning and infrastructure development on the coasts of East Ancol and West Ancol.
- Increase knowledge about global warming and monitor the impact of climate change on coastal resources, particularly East Ancol and West Ancol.

The task of consultants including: 1. Secondary data collection; 2. Survey and data acquisition, including: Satellite Imagery and Base Map; 3. Hydrodynamic analysis, namely: Tidal Analysis, Wind Data Analysis, Fetch Analysis, and Wave Analysis; 4. Hydrological analysis, namely: periodic rain data inventory, average rain analysis, rain frequency analysis, and rain distribution calculations; 5. Literature review on the issue of global warming on tourism (Eco Tourism); 6. Preparation and Discussion of the Impact of Global Warming Eco Tourism in East Ancol and West Ancol

### **CONSULTING SERVICES FOR PROJECT PREPARATION CONSULTANT (PPC) FIRM FOR DEVELOPMENT OF THE ASAHAN IRRIGATION SYSTEM IN NORTH SUMATERA, INDONESIA PHASE-I, UNDER ADB LOAN NO. 3455-INO ACCELERATING INFRASTRUCTURE DELIVERY THROUGH BETTER ENGINEERING SERVICES PROJECT (ESP), DIRECTORATE OF IRRIGATION AND LOWLAND, DG OF WATER RESOURCES (NOVEMBER 2019 – MARCH 2022)**

In this project, TRIPPCONS joint venture with Dohwa Engineering Co. Ltd, Korea (as Lead Firm), PT. Karsa Buana Lestari, and PT. Supraharmonia Consultindo.

Asahan Irrigation Project is situated in the lower Asahan river basin, about 150 km southeast of Medan, the capital of north Sumatera province There are four main rivers, Bunut river, Silau river Asahan river and Kualu river, flowing across the lower part of Asahan river basin before merging into the straits of Malacca. Of these, the Asahan river originating from Lake Toba is the largest river, having a stable base flow of about 100 m<sup>3</sup>/sec throughout the year, designed by the Asahan Hydropower Development Project (based on Master Plan Study on Lower Asahan river Basin Development). However, flood still occasionally occur along the downstream reaches of all these rivers. These floods have greatly hampered agricultural development in these areas in spite of the large development potential of land and water resources in the basin. To solve these constraints in the lower Asahan river basin, the government recognized to prepare the development of the Asahan irrigation scheme plan to prepare a comprehensive land and water resources development.

The scope of work for the preparation of the Asahan Irrigation Development Project under the Directorate of Irrigation and Lowland, DGWR will be developed in two stages: (i) Phase I will prepare the Master Plan study and Feasibility study for 110,000 ha; and Detailed Engineering Design (DED), Environment Impact Analysis (EIA), Land Acquisition and Resettlement Action Plan (LARAP), and Social Safeguard (40,000 ha) and (ii) Phase II will prepare the Detailed Engineering Design (DED), Environment Impact Analysis (EIA), Land Acquisition and Resettlement Action Plan (LARAP), and Social Safeguard (50,000 ha)

The services for the preparation of the Asahan Irrigation System Phase I are prepare (i) a comprehensive master plan for irrigated agriculture development, covering irrigation infrastructure development, smart agriculture development, and agriculture market development; (ii) feasibility studies covering infrastructure, institutional, social and environment, agriculture and access to market aspects; (iii) detailed engineering design for irrigation and associated infrastructure; (iv) social and environment safeguards including land acquisition process; and (v) preparation of bidding documents. The services also will be (1) identification of 110,000 ha area to be analyzed and recommended to Master Plan and Feasibility Study, and (2) identification of 40,000 ha area to be recommended to Detailed Engineering Design.

## OUR PAST EXPERIENCE (by Field Services)

01
